

## **“THE LIVING TABLEAU” TECHNICAL SPECIFICATIONS EXTERIOR SCREENING**

### **Projector**

- 30.000 ANSI lumens
- Full HD or WUXGA
- 3-Chip DLP
- 100% Rec. 709, or wider, gamut coverage
- HDMI 2.0 or 3G-SDI connection
- Placed within a protected scaffolding tower structure
  - Placed 3-6 meters high
  - Ideally 20-30 meters away from the facade
- Approved models:
  - Barco HDF-W30
  - Barco UDX-W32
  - Any other projector is to be approved by the AFA technical advisor / advisors.
- Calibration:
  - The projector is to be pre-calibrated by the AV rental company.
  - Final calibration is to be performed by the AFA technical advisor / advisors.

Depending on the ambient light (which should be limited, if possible) and the surface on which the video is projected (eg. color or building material), a single projector as mentioned above can project an image of 20x10 meters up to 30x15 meters.

Larger projections require multiple aligned projectors and a specialized media player, which can be discussed on a case-by-case basis.

## **Audio**

- Stereo
- Line array
- To cover the whole space
- Connection to media player: 2x ¼ inch audio jack or XLR, depending on setup
- Music is an integral part of the ‘Tableau’ and therefore high quality audio is essential.
- Final approval of sound by AFA technical advisor / advisors

## **Media Player (for single projector)**

- The media player will be provided by AFA, containing the video file.
- Power supply: 100 - 240V AC
- Ideal distance between media player and projector: less than 5 meters
- AFA will prepare and color grade the ‘Tableau’ media file to be compatible with the specific projector used.

## **Installation Supervision**

The projector and audio equipment, as well as the installation and construction costs, are to be sourced and determined locally and are the responsibility of the exhibitor. The video file and the media player are proprietary elements and will be provided by AFA. The AFA technical advisor / advisors will deliver the media player and file at an agreed upon schedule prior to the screening and will approve and calibrate the final image and sound.

The AFA curator and technical advisors will be in communication with the exhibitor and, as needed, with the local installers and AV rental company, to collaborate in the planning phase and to approve the setup and equipment provided. All technical specifications shall be strictly followed by the exhibitor or its agents.

The cost for the rental of the media player and the service of the AFA curator and technical advisor / advisors is available upon request.
